

New consumption models are driving changes in service delivery

The new reality

Variable Demand IT is a Direct Cost

New service imperative

Deliver On-demand Service

Leverage Open Technology

Lower Energy and Space Costs

Decisions must be rapid

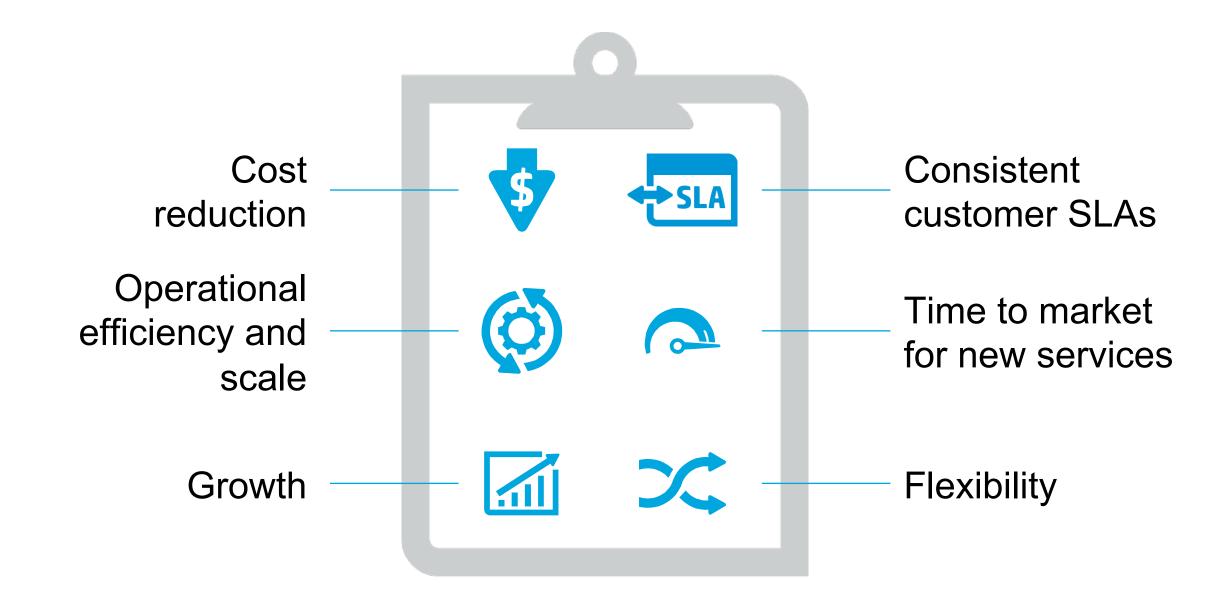

Time to revenue is critical

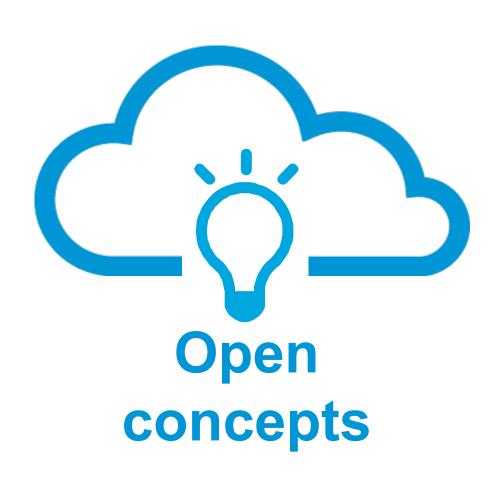

Service Providers' desired business outcomes

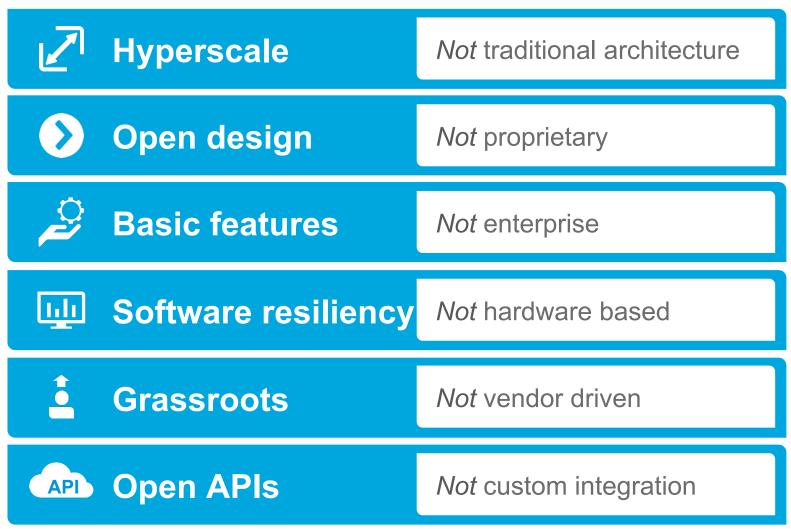

Open Infrastructure design principles

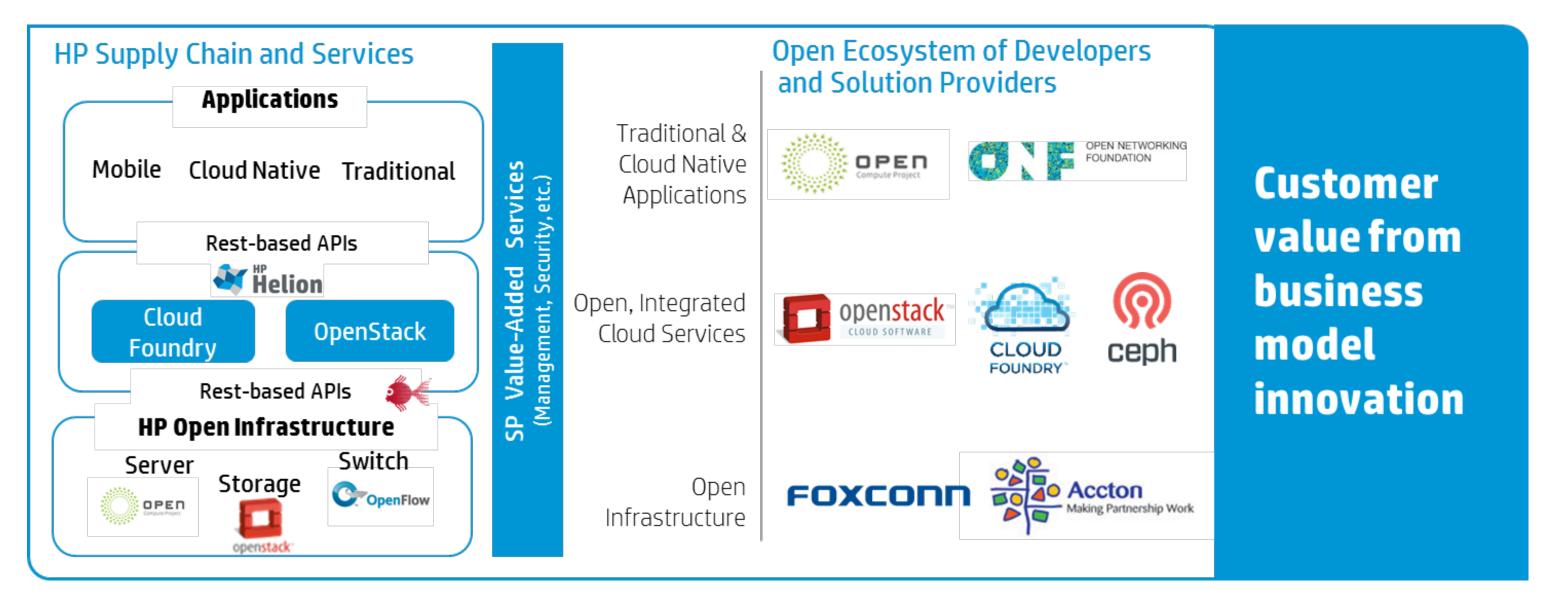

Vision: Innovation through collaboration

Open Infrastructure for Business Model Innovation

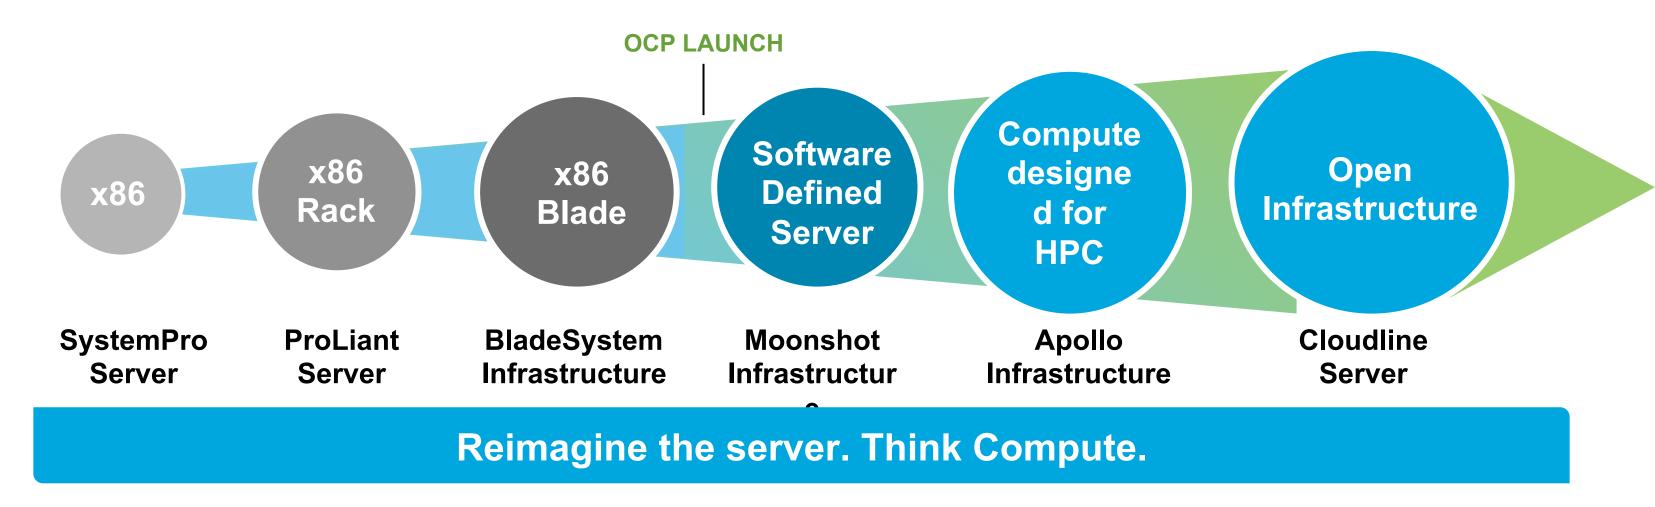

Broad portfolio of Open technologies including OCP specifications

History of HP Server innovations

HP Firsts! Technology to business model innovation

Current Gold level OCP member with goal of achieving Platinum through contribution

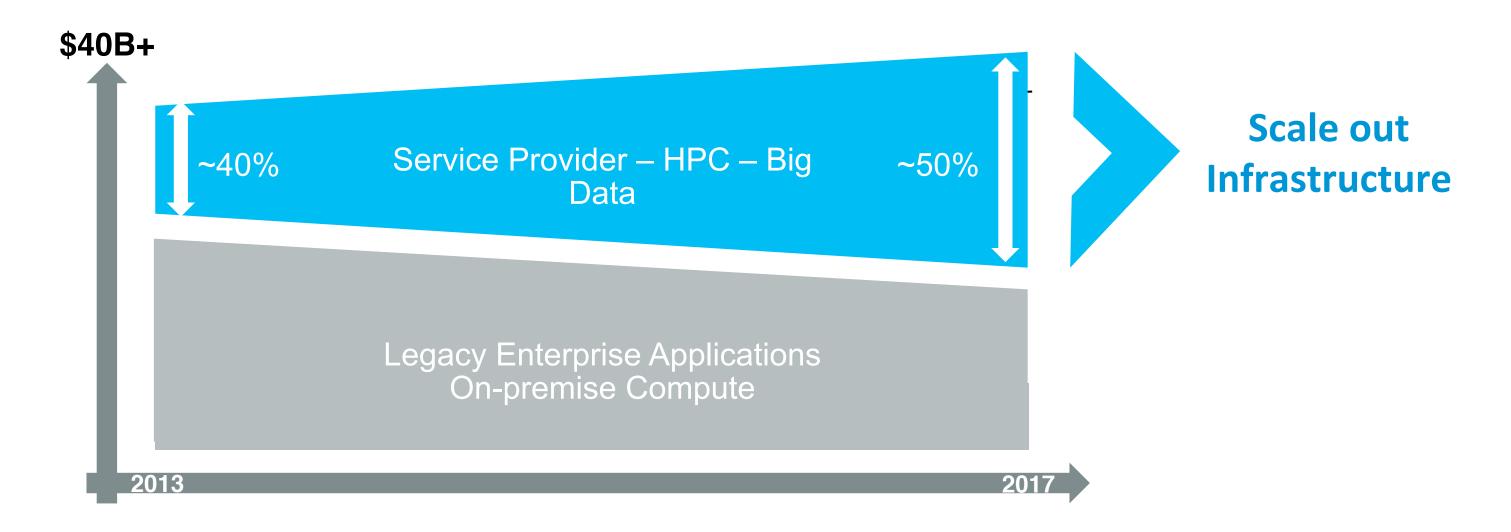

Open Infrastructure Innovation is driving growth

Scale out Compute growing faster than the market – driving all-new architectures

Open Infrastructure dimensions

Open design

Purpose-built for cloud workloads

Extreme scale

Scalability for meeting Cloud Computing challenges

Density optimized

Packaging Density to reduce Data Center TCO at scale

Cost focus

Supply Chain to acquire and service at the lowest cost

Delivering breakthrough efficiency at scale in distributed computing environments

Extreme

scale IT

drives new

architectures

HP and Foxconn Joint Venture - business innovation to deliver value

Proven global leadership in infrastructure for cloud service providers

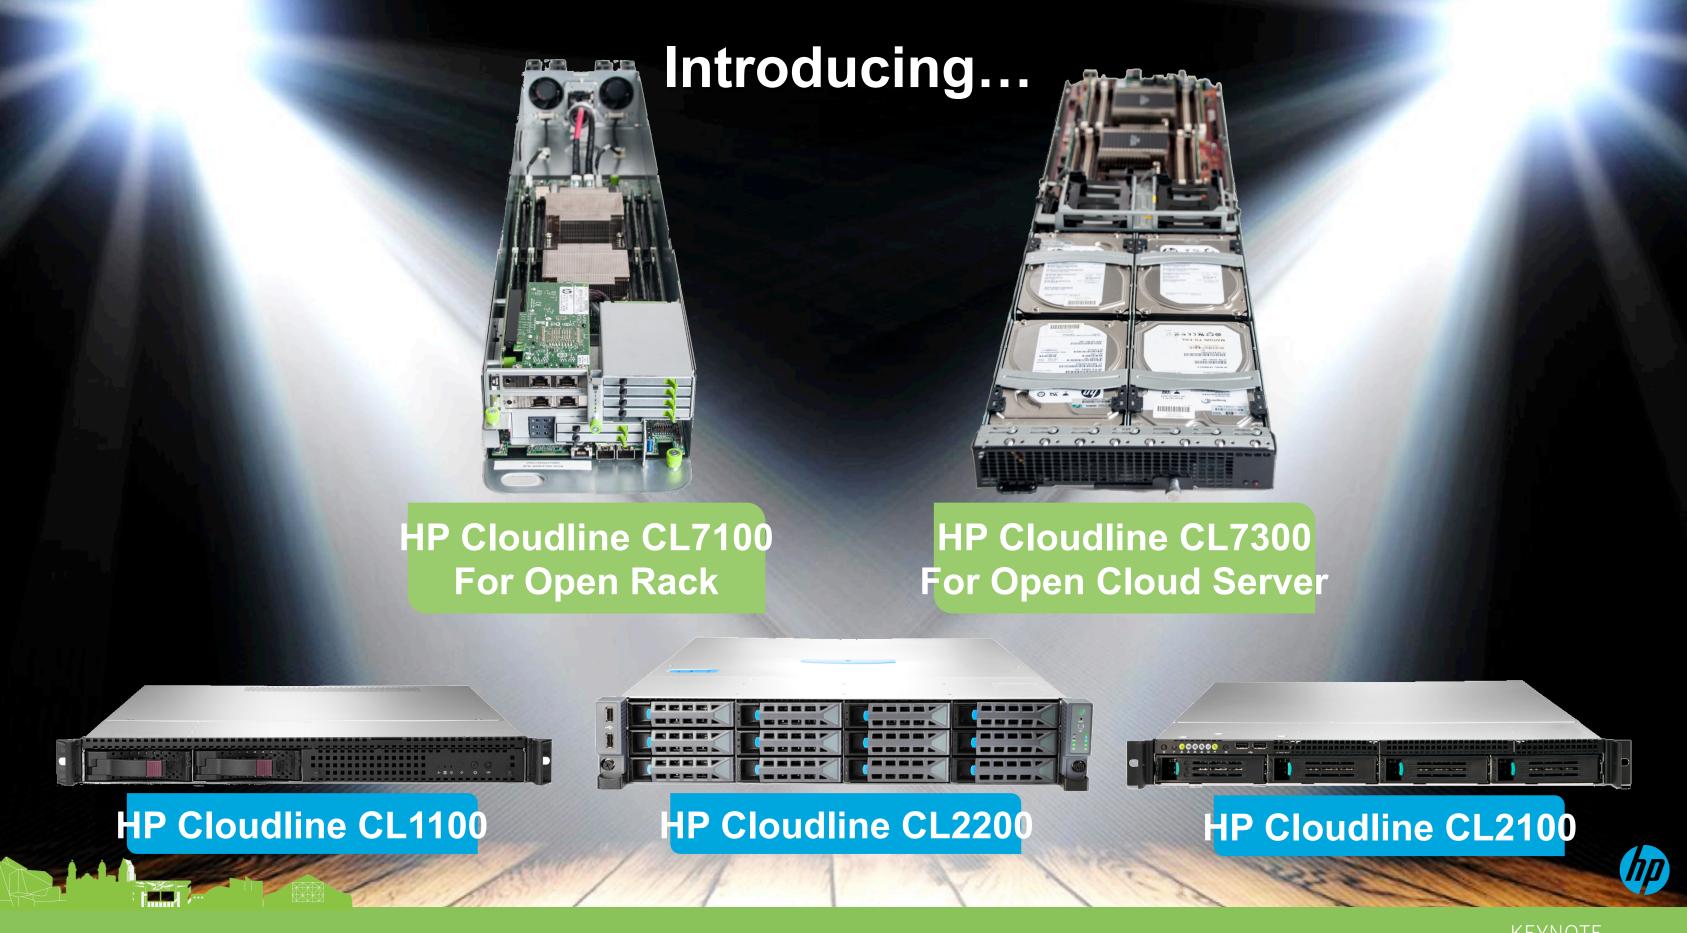

HP & Foxconn combined Leadership: 1+1 = 11 The trusted partner

- Cloud solutions designed for hyperscale workloads
- Global delivery at scale
- Global Sales, Service and Support
- Combined global supply chain capabilities of HP and Foxconn

Open Infrastructure for Cloud Services

HP Cloudline - open and cost-focused platforms for web scale

Rack scale systems

2H15

Full, rack scale platforms optimized for the largest cloud datacenters and built on open industry standards

Dense multinode servers

Future

Innovative, density optimized platforms for 2P, 1P and SoC designs to deliver superior efficiency and lowest per node cost

HP
Support &
Technical
Services

Bare iron rack servers

Now

New, lowest cost rack mount servers in the HP portfolio that are cost optimized for large-scale deployments

HP Cloudline: Compute for Cloud Service Providers

Open Design and Cost Focused for Cloud Based Service delivery

Made for **Extreme**

Scale

- Deliver at Scale
- Deploy at Scale
- Manage at Scale

Built on Open Design Principles

- Open Management Enablement
- Common Industry Firmware/ BIOS
- "Off-the-shelf" Vendor Commodities Support

Delivers Cost Focused

Infrastructure

- Basic Hardware Features
- Software Resilient Workloads
- Optimized Supply Chain

INDUSTRY LEADING CAPABILITIES FOR CLOUD SERVICES

TRUSTED BRAND

BETTER BUSINESS OUTCOMES

GLOBAL SUPPLY CHAIN DESIGN

OPTIMIZED SERVICES

CUSTOM

- Reduce Cloud service infrastructure cost
- Maximize Datacenter operations efficiency
- Increase Cloud service agility

HP Cloudline customers and partners.....more to come

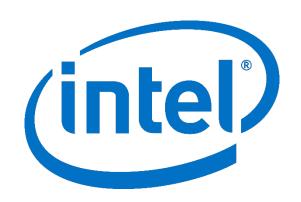

"This machine can actually provide us with **better management capabilities**, **more customization** possibilities, and a much **higher price-performance ratio**. We believe HP Cloudline is the best solution for our cloud implementation."

Tan Xiao Sheng Vice President and Chief Privacy Officer, Qihoo 360

Let's drive Open Infrastructure together

Experience our product showcase. Visit us at **Booth B3** in the main exhibit hall

Get more detail about Cloudline at our Expo Hall Keynote - Tomorrow at 12pm
