Compliance & Interoperability Chad Somerlot (Rackspace)
As Senior Director of Global Infrastructure and Engineering (GIE), Chad is responsible for all server hardware that is deployed in Rackspace datacenters and on premise customer deployments. As the C&I IC Rep, Chad's main responsibility will be to insure that the project community is creating hardware that is interoperate with legacy systems and that solutions are compatible, not only with other OCP gear but also with non-OCP hardware in the ecosystem.
