Agenda

- Minipack HW Overview
- Minipack HW Deep Dive
- MiniLake HW Deep Dive
Minipack – Next-Generation 128x 100G Switch

- Adopt cutting edge switch ASIC
- Support mature optics – 100G CWDM4
- Lower Power / Smaller Size
  - 1/2 height, ~1/2 power compared to existing Tomahawk based design – Backpack

**Switch ASIC:** Broadcom Tomahawk-3  
**Size:** 4RU (vs. 8RU Backpack)  
**Power:** ~1.4KW budgetary (At full line rate, fully populated with 128x QSFP28 CWDM4 optics)  
**Radix:** 128x
Minipack System Components

- Switch Main Board (SMB)
- System Control Module (SCM) - FRU
- Port Interface Module (PIM) - FRU
  - PIM-16Q: Port Interface Module with 16 x QSFP28 100G
  - PIM-4DD: Port Interface Module with 4 x QSFP56-DD 400G
- Fan Control Module (FCM): Top and Bottom
- Power Distribution System
  - Horizontal Bus Bar (HBAR)
  - Power Distribution Board (PDB): Left and Right
- DOM (Digital Optics Monitoring) FPGA
Minipack Chassis Architecture

- Orthogonal-direct architecture
  - Opens up airflow path for better thermal efficiency
  - Supports 100G CWDM4-Lite optics with 55 °C case temperature limit
  - Shortens PCB traces for lower loss
- FRU-able, modular PIM (line card)
  - Vertically oriented
  - PIM-16Q and PIM-4DD
  - Easy to explore other PIM options
- FRU-able SCM (micro-server carrier)
Where to use Minipack

- Minipack
  - FSW – Fabric Switch
  - SSW – Spine Switch
  - FA – Fabric Aggregator

- Supports multiple generations of rack switches

BelPower PFE1500

- Production now
- IEC-C16 AC inlet
- Single fuse: L-N
- Efficiency: 94%
- Input range: 208VAC – 230VAC

Delta HVAC

- NPI now
- HVAC inlet (Anderson)
- Dual fuse: L-L and L-N
- Efficiency: 96%
- Input range: 208VAC – 277VAC

- Full line rate on all 128x 100G ports
- PSU AC input power. The unit is Watt
- All 8 PIM slots are populated with PIM-16Q and 3.5W electrical loopback modules
Minipack Fan Tray

- Same as Backpack
- Screw-less latch for easy removal
- Powerful 80 x 80 x 80 mm counter-rotating fan
- Hot swappable
- LED built-in
- Each FCM carries 4 fan-trays. Total 8 fan-trays in Minipack chassis
- Use more fans to achieve better system thermal efficiency
Supported Optical Transceivers

- **PIM-16Q**
  - 100G QSFP28 CWDM4 optics
  - 40G QSFP+ optics
  - 200G QSFP56 FR4 optics at left column of ports on each PIM-16Q

- **PIM-4DD**
  - 400G QSFP56-DD FR4 optics
  - 200G QSFP56 FR4 optics
  - 100G QSFP28 CWDM4 optics
Switch Main Board – SMB

- TH3 12.8T switch ASIC
- BMC for SMB and chassis HW management
- 16-port switch for OOB / management GbE
- IOB FPGA as PCIe bridge to DOM (Digital Optics Monitoring) FPGAs
- Eight 6 x 12 DMO (Direct-Mate-Orthogonal) connectors to eight PIMs
- One 6 x 12 DMO connector to SCM
SMB Components

- BMC
- 16-port OOB GbE Switch
- IOB FPGA
- Power Connector to PDB-L
- DMO connectors to SCM and PIM
- Power Connectors to FCM-T and FCM-B
- 14 phase 400A VR
- SYS CPLD
- Tomahawk-3 ASIC
- Power Connector to PDB-R

SCM, PIM-2, PIM-3, PIM-4, PIM-5, PIM-6, PIM-7, PIM-8, PIM-9
PIM-16Q Block Diagram

- Broadcom Reverse Gearbox BCM81724
- Translate 2x 50G PAM4 to 4x 25G NRZ
- RS-544 to RS-528 FEC translation (termination and re-generation)
- 16x QSFP28 100G ports
- DOM FPGA
PIM-16Q Components

- 16x QSFP28 ports
- PIM alignment Pin
- EXAMAX DMO Connector to SMB
- CoolPower Power Connector
- Gearbox BCM81724
- DOM FPGA
PIM-16Q – Supported Port Speeds

Left column P1, P3, P5, P7, P9, P11, P13, P15
- 100G Mode

Right column P2, P4, P6, P8, P10, P12, P14, P16
- 100G Mode
- 40G Mode
PIM-4DD Block Diagram

- Broadcom Retimer BCM81328
- Retiming 8x 50G PAM4 to 8x 50G PAM4
- No FEC termination and regeneration
- 4x QSFP56-DD 400G ports
- DOM FPGA
PIM-4DD Components

- EXAMAX DMO Connector to SMB
- PIM Alignment Pin
- Retimer Heatsink
- CoolPower Power Connector
- Four BCM81328 Retimers
- DOM FPGA
- 4x QSFP-DD Ports
- PIM Ejector
System Control Module – SCM

- Carrier board for MiniLake COM-e CPU module
- SATA and NVMe M.2 SSD
- External console, OOB (RJ-45 or SFP), and USB interfaces
- Supports Facebook USB debug dongle
Fan Control Module – FCM

- Two FCMs in Minipack: FCM-T and FCM-B
- Each FCM supports 4 fan-trays
- BMC controls FCM CPLD via an I2C bus, which generates PWM signals to control fan speed
IOB and DOM FPGA

- Offloads CPU from direct I2C bus accesses to QSFP modules; Instead, CPU can read DOM information from FPGA buffers

- BMC also reads the optics temperature information through an I2C bus to FPGA buffers for the purpose of system fan control

- Provide MIIM (MDIO/MDC) master controllers for CPU to configure / monitor the gearbox chips on PIM-16Q (or retimers on PIM-4DD)
FPGA Block Diagram
Agenda

- Minipack HW Overview
- Minipack HW Deep Dive
- MiniLake HW Deep Dive
MiniLake Introduction

- MiniLake is a COM-Express CPU Module
- MiniLake is currently implemented in Minipack Switch System
- Our Motivation to build MiniLake:
  1. Provide a compact solution with specified configuration
  2. Provide powerful IOs across different applications
  3. Better support on BIOS and OpenBMC features
