

Source	Doc	Location-Regarding	Comment	Response
Bernie	Baseline Spec	Page 13, table 8	The entry "Links/ManagedForService" should be instead "Links/ManagerForServers".	In Baseline Spec v0.2.1, fixed typo in v0.2.1
Bernie	Baseline JSON	Line 66 (EthernetInterfaceCollection)	Shouldn't line be "EthernetInterfaces" i.e. plural, indicating a collection? Or at least an element called "EthernetInterfaceCollection" either at the top	In Baseline JSON v0.2.1, added EthernetInterfaceCollection (with Members.Mincount = 1)
Bernie	Baseline JSON	EthernetInterfaces	~ There are two definitions of the EthernetInterface type (or element?), one in Base and one in Server. ~ The JSON file for Server differs from the PDF for EthernetInterface precisely on the IPv6 part ~ Does the Server definition (which has no IPv6 support) override the Base?	Override interpretation is correct. ~ In Server Spec v0.2.1, add text explaining this interpretation.
Bernie	Baseline JSON	EthernetInterfaces/DHCP	The property names for DHCPv4 and DHCPv6 have a colon within the double quotes.	In Baseline JSON v0.2.1, fixed typo.
J. Autor	Baseline JSON	SerialNumber	Serial Number should be recommended. ~ In partitioned systems, individual systems may not have individual serial numbers.	In Baseline JSON v1.0.0, make SerialNumber recommended.
Norman	Baseline JSON	Recommended	What is the interpretation on "Recommended" In the Redfish Forum, "Recommended" means 'Optional and recommended, and may become mandatory in the future'. OCP can adopt their own interpretation ~ Decision in meeting was to use the same interpretation.	In Baseline Spec v0.2.2, described the meaning of Recommended. In Server Spec v0.2.1, described the meaning of Recommended.
Bernie	Server JSON	ChassisType	For the server profile, Power and Thermal is mandatory only if ChassisType has specific values	In Server JSON v0.2.1, added ConditionalRequirement property in Chassis.Thermal and Chassis.Power property
J. Autor	Server JSON	Comparison	The "Comparison" property was changed to "CompareType" in the Redfish Profile Spec	In Server JSON v0.2.2, change name to CompareType

J. Autor	Server JSON	SerialNumber	Decide if SerialNumber is mandatory in Server Profile (see change to Baseline JSON)	?
