# OPEN DRIVE TEST

Asghar Riahi

Senior Solutions Architect

Red Hat Inc.

**OPEN HARDWARE.**

**OPEN SOFTWARE.**

**OPEN FUTURE.**

# Agenda

- How are storage drives tested today?
- Why Open Drive Test?
- Who are the players?
- What are the Next Steps

# How are storage drives tested today?

- Each Customer (CSPs, OEMs, ...) tests HDD/SSD separately
- Let's say cost of ~\$10-\$20m/quarterly/CSP
  - Example: If 5 CSPs spend \$15m/quarterly = \$75/quarterly = \$300m/year
- Time
- TCO
- Resources
- Sharing the Best Practices?
- Possible Delay in Time to Market of their Apps or Services

# Why Open Drive Test?

- Cost savings
- Share Best Practices
- Guideline (not a standard) to improve and accelerate the qualification process
- Focus on common criteria
- Prediction models
- Early quality excursion detection with large drives quantities tested
- Option of extra-long life tests
- Use open-computer enclosure design
- Testing so many drives in a uniform environment allows to build reliable failure prediction models

# Considerations:

- End-user confidentiality (who buys drives, how many and when)
- Testing in the final system vs. generic testing in a standardized tester
- Burn-in vs. short integration test
- New integration failures at customer (should be a very low number but not zero)
- Test of specific drives for a specific customer (list of SNs) or any drives of the same type
- Testing with customer-unique firmware features
- Agreeing on these workload, temperature, duration, and failure criteria
- Is this a prelim test or a final test?
- Option of extra-long life tests
- Use open-computer enclosure design

# Considerations:

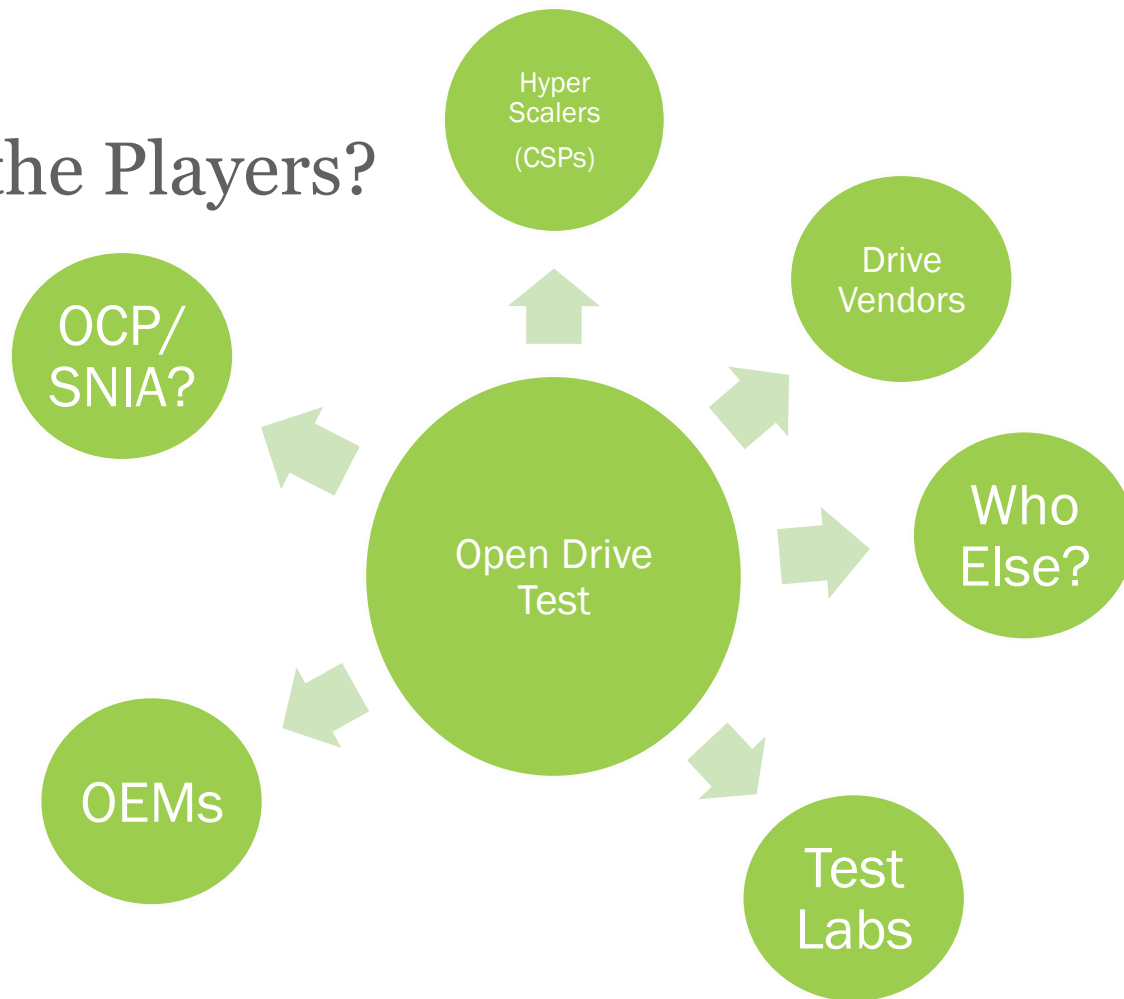

- Test location (cheaper energy geographies)
- Both SSD and HDD
- Typical time to test drives varies from days to weeks
- Failure rate reduction goals:

In house testing: [-----]

Open Drive Testing: [-----] 

- End-user confidentiality (who buys drives, how many and when)

# Who Are the Players?

# What are the Next Step

- How interested are you?
- Form a Working Group compiled of interested parties to work on a draft document.
- ...

# THANK YOU
