- Mark Shaw – Microsoft
- Bill Carter - Intel
- Martin Goldstein – Microsoft
- Kenneth Ma
- Uma P
- Bob Ogrey - AMD
- John Stuewe - Dell
- Steve Helvie
- Ravi
- Yuan
- 408 – Ravi & Nazeem
- 408 – David Shih Altera
- Geoffrey Mershon
- Jia Ning - Facebook
- Brian Niepoky - Intel

Minutes from 1/8 meeting

- Summit!
- IC 2/11, need all specs and contributions in before then.
- Quanta's Winterfell – should be up for vote now, let the new stuff for 2/4 committee.
  - We'd already dispositioned this, had the IC level discussions already. Waiting for the IC vote.
  - Action to get this to Amber.
- FPGA cards
- Additional contributions are coming! Facebook, Quanta.
- OCP call for papers is out. See Amber's email.
  - Due 1/29, committee review the first week of Feb.
  - Looking for great adoption stories, could be chosen for keynote or workshop committee.
- Demo space, Amber is working on space. Amir and Asghar organizing this.
  - Last year was a small number of racks.
  - If we wanted to allow for the community to see the machines in operation. i.e. how would somebody deploy an operating system and software onto a system. Everybody brings pieces and parts and we show how easy it is to rack and stack, deploy hardware. Break the misconceptions that OCP hardware is difficult to deploy (but we users know better ☺). Many times h/w in the booths don't show it in action.
- Intent is to clear everything out by the end of the month.

Happy New Year!
